PROFESSIONAL SUMMARY

Certified EC-Council Certified SOC Analyst (CSA) with hands-on experience in Network Operations Center (NOC) monitoring, incident management, and enterprise network support. Currently working at the Kerala Government Secretariat NOC, monitoring network infrastructure, troubleshooting connectivity issues, and managing incidents. Built a personal Security Operations Center (SOC) lab using Splunk Enterprise, Kali Linux, Windows Server, and FortiGate Firewall to gain practical experience in SIEM monitoring, log analysis, threat detection, and incident response. Passionate about cybersecurity and eager to contribute as a SOC Analyst while continuously enhancing technical and analytical skills.

TECHNICAL SKILLS

SIEM	NETWORKING	SECURITY TOOLS	FIREWALL	OPERATING SYSTEMS	virtualization
Splunk enterprise	Tcp/ip	Wireshark	FORTIGATE	LINUX	EVENG
Splunk universal forwarder	Osi model	NMAP	CISCO SECURITY	WINDOWS	VM WARE
Log monitoring	Vlan	METASPLOIT		KALI	VIRTUAL BOX
dashboard	Routing and switching	JOHN THE RIPPER		UBUNTU	
Security event analysis	Dns, dhcp, NAT,VPN	OWASP ZAP			

Other Skills

Incident Response

Threat Detection

Log Analysis

Network Monitoring

Troubleshooting

Documentation

PROFESSIONAL EXPERIENCE

Network Support Assistant

Kerala Government Secretariat – Network Operations Center (NOC)

Responsibilities

Monitor enterprise network infrastructure to ensure continuous availability and optimal performance.

Register, prioritize, and track network incidents while maintaining service level agreements (SLAs).

Troubleshoot LAN, WAN, DNS, DHCP, VLAN, routing, switching, and connectivity-related issues.

Monitor Cisco Catalyst and Juniper network devices using enterprise monitoring tools.

Coordinate with technical teams to resolve critical network incidents and minimize downtime.

Maintain daily operational reports, incident documentation, and escalation records.

Assist users by diagnosing and resolving network-related technical issues.

Monitor network traffic for suspicious activities and support security incident identification.

Detected unauthorized cryptocurrency mining traffic within the organization's network during routine monitoring and escalated the incident to the cybersecurity team for investigation and remediation.

CYBERSECURITY PROJECTS

Home Security Operations Center (SOC) Lab

Designed and implemented a personal SOC environment using Splunk Enterprise.

Configured Splunk Universal Forwarder for centralized log collection.

Integrated Linux systems for security log monitoring.

Created custom dashboards for security event visualization.

Performed attack simulations using Kali Linux.

Investigated security events through log analysis.

Practiced incident detection and response workflows

Enterprise Network Simulation Lab

Built enterprise network topologies using EVE-NG.

Configured routers, switches, and FortiGate Firewall.

Implemented VLAN segmentation and routing.

Captured and analyzed network traffic using Wireshark.

Conducted vulnerability assessments using Nmap.

Employee Attendance Management System

Developed a Flask-based attendance management application.

Implemented secure user authentication.

Designed an administrator dashboard.

Integrated SQLite database for attendance management.

Generated attendance reports and employee records.

CERTIFICATIONS

EC-Council Certified SOC Analyst (CSA) | CICA

Cisco Security Fundamentals | Fortinet

EDUCATION

DIPLOMA IN COMPUTER ENGINEERING , KERALA TECHNICAL UNIVERSITY

Bachelor of Computer Applications (Pursuing)

Institute of Distance Education, University of Madras

Expected Graduation: **2028**

SOFT SKILLS

Incident Management, Analytical Thinking , Problem Solving , Communication , Technical Documentation , Time management , Attention Details

LANGUAGES

English , Malayalam , Hindi
