PROFESSIONAL SUMMARY

Cybersecurity and Network Operations professional with 1.8+ years of experience in Network Operations Center (NOC) environments, network monitoring, incident management, and infrastructure support. Experienced in monitoring enterprise networks, troubleshooting connectivity issues, analyzing network traffic, and supporting security operations. Hands-on exposure to SIEM concepts, log analysis, firewall monitoring, and threat detection through professional experience and cybersecurity labs. Strong knowledge of TCP/IP, routing, switching, VLANs, and network security fundamentals. Seeking to transition into a SOC Analyst role.

CORE COMPETENCIES

• Network Operations Center (NOC) Monitoring • Security Monitoring • Incident Detection, Response & Escalation • Log Analysis & Event Correlation • Network Security Monitoring • Firewall Monitoring & Analysis (FortiGate) • SIEM Fundamentals (Splunk Lab) • Threat Detection & Investigation • TCP/IP, VLANs, Routing & Switching • Cisco Catalyst 9200L Switches • Juniper Switching Technologies • Wireshark Packet Analysis • PRTG Network Monitoring • DNS, DHCP & SNMP Management • Incident Management & SLA Compliance

TOOLS & TECHNOLOGIES

Splunk (Lab) | FortiGate Analyzer | Wireshark | PRTG Network Monitor | Cisco Catalyst 9200L | Juniper Switches | DNS | DHCP | SNMP | TCP/IP | VLANs | Windows | Linux

PROFESSIONAL EXPERIENCE

Network Support Assistant | Kerala Government Secretariat | Current

• Monitor and maintain critical government network infrastructure and services. • Troubleshoot network connectivity, performance, and service availability issues. • Support firewall monitoring and network security operations. • Monitor incidents, perform initial analysis, and ensure timely escalation. • Maintain operational logs, incident records, and technical documentation. • Coordinate with network, security, and vendor teams to ensure service continuity.

Junior Network Engineer | Armtech Computer Services Pvt. Ltd. | Feb 2026 – Present

• Monitored and managed over 100 network devices within a NOC environment. • Performed proactive network monitoring, alert handling, and incident response activities. • Analyzed network traffic using Wireshark to identify connectivity issues and anomalies. • Supported Cisco Catalyst 9200L and Juniper switching infrastructure. • Monitored security logs and events using FortiGate Analyzer. • Managed and monitored DNS, DHCP, and SNMP services. • Escalated critical incidents to L2/L3 teams and tracked resolution progress. • Prepared incident reports and root cause analysis documentation.

Technical Support Assistant | CRUX Management Services Pty Ltd. | Sep 2024 – Jan 2026

- Resolved 1000+ support tickets involving network and system-related issues.
- Diagnosed and resolved LAN/WAN connectivity problems.
- Performed root cause analysis for recurring incidents.
- Improved issue resolution efficiency through structured troubleshooting.
- Maintained ticketing systems, operational records, and technical documentation.

PROJECTS

Network Traffic Analysis Using Wireshark • Captured and analyzed network traffic to identify suspicious activities and communication patterns. • Investigated network protocols and troubleshooting scenarios through packet analysis.

Splunk SIEM Lab • Configured log ingestion and event monitoring in Splunk. • Performed log analysis and security event investigation. • Created dashboards and searches for basic threat detection use cases.

CERTIFICATIONS

- EC-Council Certified SOC Analyst (CSA)
- Fortinet Firewall Certification
- CICS Red Team Certification

EDUCATION

Bachelor of Computer Applications (BCA) – Pursuing

Diploma in Computer Engineering Government Polytechnic College 2018 – 2022
